Hopper

Congratulations on your new Pedestal product.

We welcome you on our journey towards creating flexible interior design solutions for tv-screens.

Back in the day, televisions were design objects – beautifully made, and put on display. But somewhere along the line, we began to care less about how they look.

Most of us have a big screen at home. Personally, we love them. We watch, zap, and binge with a single click. But making them look good? Now, that's a challenge.

Mounts, pods, links, stands, call them what you want. Those things that hold your screen can really ruin your feng shui. Setting up your screen at home can feel like choosing between a living room – or a screening room.

So, we founded Pedestal.

We're a small team of people who design furniture that hold screens, inspired by 20th century industrial aesthetics. They should look good and work just right. That's it.
